

# What does the cost of an evaluation include?

01

An intake phone call between the psychologist and parent(s)/guardian(s) that typically lasts between 60-90 minutes

02

An in-person evaluation at our clinic that typically lasts between 2-5 hours, depending on the number of assessments needed. While the child is in the evaluation, the parent/guardian will complete report measures about the child.

03

The psychologist reviews records, gathers information from a teacher or other helpful informant, scores the assessment measures, interprets the results of testing, writes a detailed report, and provides recommendations that are specific to the needs of the child (typically 4-6 hours).

04

A 1-hour virtual feedback session between the psychologist and parent(s)/guardian(s) to review results, provide recommendations, and answer questions
